

IBS

Product Warranty

Materials

Luxor warrants that the materials used to manufacture its IBS 2000® will comply with Luxor's list of approved Materials or their equivalents.

Workmanship

Luxor warrants that IBS 2000® will be manufactured as per the approved Quality Assurance Manual requirements.

Product Stiffness

Luxor warrants that IBS 2000® will deliver the average stiffness values approved by CCMC (Evaluation Reports 12694-R and 13121-R) with COV of 15%.

Product Attachment

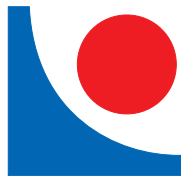

Luxor warrants that IBS 2000® will maintain its attachment to joists under design floor loading for residential and light commercial when installed using the recommended size, number and placement of fasteners.

IBS Retrofit

Floor performance is also affected by other framing conditions such as connectors / hangers, supporting beams or members, type of materials used and workmanship. IBS 2000® will not remedy problems with the floor support structure.

Floor Acceptability

Luxor warrants that IBS 2000® floors when designed and built as per Luxor's procedures using approved floor components would deliver customer acceptability equal to that in the National Building Code Canada (NBCC).
