Quantity:	Size:	Length:	Camber:	Marks / Labels / Notes:

Appearance:
- ☐ Industrial[1]
- ☐ Architectural[2]
- ☐ Premium[3]

Strength:
- ☐ 2000f
- ☐ 2400f
- ☐ 3000f

Lay-up:
- ☐ E[4]
- ☐ EX[5]

Species:
- ☐ DFL
- ☐ WRC
- ☐ AYC

Texture:
- ☐ Normal
- ☐ Rough-Sawn
- ☐ Wire-Brush

Fabrication:
- ☐ Ends Wilds
- ☐ One End Wild
- ☐ Square Ends

Protection:
- ☐ No Sealer
- ☐ End Seal Only
- ☐ Face/End Seal

Packaging:
- ☐ Load Cover
- ☐ Bundle Wrap
- ☐ Individual Wrap

Notes:
1. Industrial grade: mechanically graded lumber, can have wane, large knots and glue marks. Typically used where visual appearance is not a factor.
2. Architectural grade: mechanically and visually graded lumber, no wane, no knot holes and an unsanded surface. Most economical, visually appealing beam.
3. Premium grade: mechanically and visually graded lumber, no wane, no knot holes & sanded surfaces. Can also be ordered as Premium STK (small tight knots).
4. E Lay-up: Directional lay-up used in fabrication, where the beam will be labeled for top and bottom surfaces. Often referred to as a V4 lay-up.
5. EX Lay-up: Non-directional lay-up fabrication, with no top or bottom. Often referred to as a V8 lay-up.
